NATURE UNBOUND FIELD EXPERIENCE GUIDELINES FOR LESSON 9

OBJECTIVES

Students participating in *Nature Unbound* field experiences will:

- Research and investigate a local ecosystem
- Formulate testable questions and hypotheses about the ecosystem
- Design and conduct field investigations
- Record observations and collect pertinent data
- Devise a multi-step plan to restore and/or manage for the stability and/or biodiversity of the ecosystem
- Demonstrate and apply use of science notebooks

In order to qualify for reimbursement of transportation costs for field experiences taken in conjunction with the *Nature Unbound* unit, field experiences must:

- Serve to satisfy the CLEs and objective of Lesson 9 of *Nature Unbound*
- Occur at an outdoor ecosystem within 100 miles of the participating school
- Provide students with opportunities to apply inquiry and field investigation skills and knowledge gained through activities in *Nature Unbound*

EXAMPLES OF DESTINATIONS

- Conservation area or state park
- National forest
- City or county park
- Schoolyard ecosystem
- Private property

Meaningful opportunities for students to apply knowledge and skills fully to the field experience should include:

- Pre-trip planning time for students to research the ecosystem's history, components, management practices, etc., to create maps and decide what data is needed to help with their plan
- Ample time for students to conduct field investigations, record observations, collect data, and devise a multi-step resource management plan
- Post-trip activities, including a presentation of each group's plan to the class
- Evaluation of each group's plan, which may be conducted by peer groups
